COMPANY PREQUALIFICATION

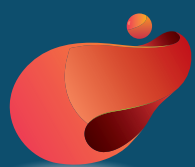

INTRODUCTION

Arab Tower Electromechanical Cont. L.L.C is a total Electromechanical Solution Provider, focusing our efforts in building services (Residential and Commercial), Telecommunication Services, HV & LV System Designing and execution of work, Fire Fighting Services, A/C Services, Maintenance Services and Plumbing Services. As an independent system integrator, Arab Tower has the objectivity to offer unbiased analysis of your present & future needs. This independent objectivity allows us to look at the total picture & configure flexible, cost effective systems utilizing the latest proven technology. Our team promotes close working relationship and allows us the flexibility to be involved to any degree needed from the initial engineering specification development to the turn-key design and implementation of the entire systems.

Arab Tower Electromechanical Cont. manages and controls any type of Electromechanical Works through experts. We actively lead progress of facility solutions by forecasting future trends and directing the course of development by embracing today's technologies. Utilizing engineers, trained Building Management Systems as well as software processes, Arab Tower offers a flexible workforce that adapts to meet customer needs.

We provide detailed analysis of every aspect of building performance from energy use to environmental impact and safety features. We work with clients and consultant together from the earlier stages of design, to help teams get their designs 'right first time' the team at ATEC has been successfully involved in turn-key projects for many years now.

ABOUT OUR COMPANY

OUR MISSION

Our Mission is to serve our customers with confidence and offer best quality of products and offer Innovative & Cost effective solutions and services.

PEOPLE

- We recruit top performers who are demanding, dedicated and oriented results.
- We want people who like working in teams and who grant others equal trust and respect.
- We want people who believe in treating others the way they want to be treated.
- We expect our people to lead, to seek and provide feedback and believe that improvement is always possible.
- We expect only positive work attitudes and seek solutions not fault.
- We treat our partners (Customers, Resellers, Suppliers and Contractors) as extensions of our own organization.

PERFORMANCE

- We measure our success based upon growth of customers and repeat orders.
- We are financially conservative and clearly understand we are in business to make profits.

BUILDING SERVICES

A building is said 'complete' only when it is made functional and livable. Once the building is ready it is added with elements that bring life to it!

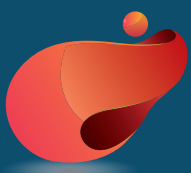

Bringing life is creation, making a building functional is an art. It is intricate, and not that easy! But not for us!

From electricity to gas lines and renewable energy sources, from water supply, drainage to plumbing works, from telephone, IT lines to TV cables, from escalators to ventilation, from fire detectors to security alarm systems, and from heating / cooling systems to lighting the building, we do all the services that a complete building requires.

With perfect design and meticulous planning, we not only do the installations, also make our self available and fully responsible for the maintenance of the building and its energy and life support systems.

Be it a house called home or a commercial building like offices, shops, malls, hotels, resorts and other large establishments like residential and commercial towers, hospitals, bus and railway stations, airports and shrines, you name it, and we are specialized in all types of installations and maintenance services with 100% satisfaction to the clients

So, where is your construction? Come; let us make it a perfect building!

SWITCHGEAR SERVICES

Switchgear is electrical equipment that is used to regulate, control and switching power supply and other devices in an electrical power system. It is a combination of electrical equipment like electrical meters, disconnect switches and fuses or circuit breakers.

Every big building and establishment needs a switchgear system. Installation is a complex process which is to be done with utmost care. We have our experts to do the installation of a complete electrical power system and switchgear apparatus that provides your industry a trouble free power supply and keeps your electrical bills under control.

Maintenance of this equipment is another big job, which is very important for constant and hassle free power supply to your establishments. We are second to none in providing you a proper maintenance of your switchgear, and keep your business running...

We deal with only high quality equipment, and use our unmatched expertise in bringing in the best of the type of equipment that is needed for you. And, our duty doesn't stop there; we will be in constant touch with you in the maintenance of your equipment, and will have a continued relationship in dealing with your power equipment. Contact us to know more, and get your power system job done effectively, and everything within your budget!

HV & LV NETWORK DESIGNING SERVICES

HV and LV Power Layout Services:

For any building, proper installation of Electrical infrastructure is as important as the construction of the building itself. Be it High or Low voltage, our engineers have all the expertise in finding what exactly your building or business require. And, accordingly we work for you!

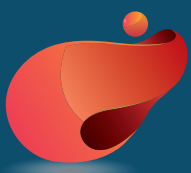

A world class design, materials of high quality, and the right kind of infrastructure that is required are installed. It is seen that each and every division of your establishment is met with suitable and uninterrupted power supply...

The electrical system once installed, no matter how good and world class it is, by time, it undergoes depreciation and deterioration. In some cases of power installations, these changes are not foreseen and planned. These types of installations, sometimes give rise to unmanageable problems, and may show its effect in the entire supply system.

A world class installation and establishment of excellent power infrastructure is our forte. Also, when it comes about maintenance services, we are second to none! HV or LV, or whatever the nature of supply be, our crew of highly skilled technicians is all at your service, for all kinds maintenance services and overall care.

So, how much importance and care should you give to your building's electrical power infrastructure?

Leave it to us. Be it installation or maintenance, once handed over, it is our responsibility!

TELECOMMUNICATION SERVICES

Telecommunications is an essential part of our living. And, when it comes to an office or any commercial establishment, it is considered a near shutdown when there is a failure in the telecommunications infrastructure!

Telecommunications enables us to make rapid exchange of information with others within the office or outside it. Yes, for a smooth functioning of your office you need an effective communications network!

And, installing an effective communications infrastructure is not that easy. It deals with a superb design, technologies that is updated, and lot of cables running through the structures of your office. The telecommunication closet, cables and the phone instruments need to be properly and effectively connected. And, not to mention, all materials should be of high quality!

The design of the telecommunications network is made according to your office's basic structure and, type of your business and requirements. If a tower is required it is installed accordingly.

Installation is one big job, and maintenance is another, which is more complicated. Again, only an effective and highly skilled team of men can do this! We are proud to declare that we have that team of men, and our service in both installation and maintenance is no less great than the best in the world!

Communicate to us, for making your communications stronger and better!

MAINTENANCE SERVICES

Construction of a building requires planning and right execution. And, once constructed, every building needs proper attention, and care. Yes, maintenance keeps your building in good shape, and makes safe!

A pleasant living environment is ensured only when your building is free from any sort of trouble.

Whatever is the quality of construction, due to atmospheric changes and other external and internal pressures, all buildings and constructions show signs of some sort of problems like staining, cracking, falling of plasters etc. These, not only gives bad look; it also gives many complications in the long run, spoiling the very living atmosphere for the inhabitants.

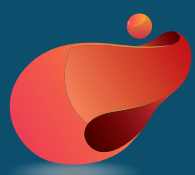

Not only the building, the surroundings and other parts of the premises also need proper maintenance, lest, by time, it starts affecting the existence of the main building. The peripherals like the compound wall, the garden, trees, lawn, swimming pool and other constructions and installations should also be given regular attention.

Electrical power system, water sources and supply, telecommunication networks, air conditioning are some of the vital nerve centers of any building that requires constant maintenance.

Security, of the building and also that of the residents and other visitors, is one prime concern. It should be in place, and maintained.

Be it home or office, or any large establishment like hotels, resorts, malls, hospitals and mosques, for peaceful existence, your building requires constant attention and maintenance. And, we have our team of experts, who are qualified in their own field, and they are here at your service in all types of maintenance and care!

Stop worrying. Give a call or write to us... Your peaceful living is our responsibility!

AIR CONDITIONING SERVICES

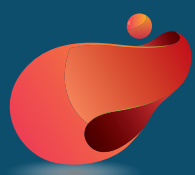

Air conditioning services is one of the departments that our company excels in expertise, in both installation and maintenance! We are known as the most cost effective, high quality and environment friendly service provider, a cool company for all types of buildings, right from small to medium level office complexes, and also big establishments like huge commercial buildings, malls, hotels, restaurants, resorts, hospitals etc.

Understanding the complex structure of the building and the requirements of the clients, our team of experts come out with class designs and develops the right kind of AC plants and units that makes the most effective cooling systems that is at par with the best in the world.

Our job does not stop there. We do periodical tests for effectiveness, and give regular maintenance support to your plants and units.

Known for providing best and high quality service, we have also earned a name for applying the most cost effective methods in maintenance. Unless there is a must, we never go for component replacement, but at the same time we never compromise on the output just for the sake of saving some money!

We always stood out from crowd, for quality and excellent service! And, ours is really a cool deal... Call us, free your worries, and chill out!

FIRE FIGHTING SERVICES

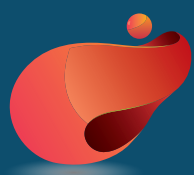

Be it a residential or commercial complex, installation of a Fire fighting system is one of the most essential parts of any building. It is a complex job too as it involves many factors and elements that are to be strictly followed while designing and installing in an establishment.

At the construction level itself, the system is integrated in the building structure, and more equipment are added to the construction once it is completed. It is not that difficult too, even if the installation is done in an already constructed or completed building... Sheer application of mind, and knowledge and skill, and an effective man force is all that is needed for this job.

Apart from designing suitable fire exits in the building, the men in job, also comes out with a design for laying pipes that supplies water to all the floors and nooks and corners of the building, and makes hose cabinets at accessible places, and also provide sprinklers in the corridors, halls and rooms and other places of a residential or any office complex, airports, hotels, hospitals and other religious, social and business establishments.

Our men also know what type of fire extinguishers are required for a particular building or part of that building, and provide user manuals at places. We also do maintenance of the entire system!

Safety first, it is said... And, your safety is our responsibility!

PLUMBING SERVICES

‘Plumbing’ is derived from the Latin word ‘plumbum’ meaning lead, as in the days of yore, the pipes and other related materials were made of chemical compound Lead!

Okay, let’s come to our business...

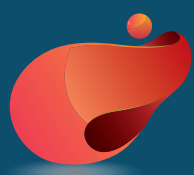

Plumbing is not just connecting pipes and supplying water or fluid materials to your home and other commercial establishments, it is also a job that makes the smooth supply of gas through pipes to homes and hospitals, providing cooling and heating systems and the working of drainage network!

A plumber is not just an ordinary man. He is an engineer of sort, who knows the expertise of the effective supply fluids through pipes. When one of your water supplies gets shutdown and when your headache starts, that is the time you understand the value of a plumber! And, the value of our plumber is something more! He is knowledgeable, he is skilled, and he is an expert!

Laying pipes and installation of a supply for water is not an easy job, and the same is for piped gas supply. But, not for us! Creating a hassle free drainage system is complicated too. But, we do it with ease!

For homes, hotels, office complexes, hospitals, resorts and you name any complex building, we are there, and our experts do the trick! Maintenance services for these water and gas supply, and drainage systems are also provided, a support given by our highly qualified experts!

Want to install a world class water supply or drainage system, give a call or write to us...

SECURITY SURVEILLANCE SERVICES

An office built with all the comfort and facilities, and is also running smooth... Okay, but, where is the security system?

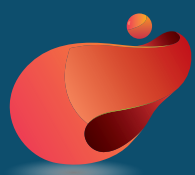

Yes, some offices don't realize, or give a regard, that how safe their office is or the employees are... It is like building a house without walls!

In a world of high competition, and insecurity, every building, be it a residential or commercial, is vulnerable to many risks, and potential threats. The only solution is installation of an effective Security surveillance system!

We, a team of experts, which has a clear understanding of the nature of potential security risks, are here to install the required security systems in your building. From installation of CCTV surveillance and monitoring systems to high security alarm networks, and from entry and exit access systems to employee, and warehouse surveillance systems, we can make your building one of the highly secured areas around.

We are also specialized in peripheral security and alarm systems that is widely installed in large establishments like airports, hospitals and banks and other financial buildings. Monitoring can be done even from the other corner of the world!

Our department, created exclusively, with a team of highly skilled experts, also provides maintenance services for these security services, and all at a cost that would not burn your purses. But, we never compromise in the service we provide... After all, safety is our prime concern. And, safety comes from security!
